## DETAILED ACTION

This application has been examined. The claims 1-15 are allowed.

### *Reasons For Allowance*

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a device driving a display apparatus having a plurality of display panels, said device comprising an interface circuit for receiving display data from an external processor, and control register for storing drive-line-number information on a number of drive lines provided in each of said plurality of display panels, and panel-selection information for selecting one of said plurality of display panels. The combination of the closest of prior art of Saito et al. (US 6,806,860), Hirai et al. (US 5,874,933) and Yamazaki (US 5,670,970) showed a similar invention. However, they fail to teach that wherein said interface circuit receives said drive-line-number information and said panel-selection information from said external processor prior to driving of said selected display panel, and said control register stores said drive-line-number information and said panel-selection information prior to the driving of said selected display panel in response to a demand from external processor as claim 1, or wherein said interface circuit receives said drive-line-number information and said region-selection information from said external processor for each power turn-on of said device, and said control register stores said drive-line-number information and said region-selection information in response to a demand from said external processor for said each power turn-on of said device as claim 8, or wherein in a first case in which main screen is brought in to a display mode and said sub-screen is brought into a non-display mode; and in a second case in which said main screen is brought into a non-display mode and said sub-screen is brought into a display mode in compliance with an

instruction from said external processor, said gray-scale voltage selector outputs said selected grayscale voltages to said sub-screen via said data lines, and outputs a gray scale voltage relatively lower among said plurality of gray scale voltages to said main screen as claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
